

# Software Test Engineer

## Overview

Wenco International Mining Systems ([www.wencomine.com](http://www.wencomine.com)) provides GPS-based fleet management systems for open pit mines worldwide. We are looking for a Quality Assurance Engineer or a new graduate who is interested in software testing. The successful candidate will have a demonstrated ability to manage multiple priorities, keep up with fast-paced schedules, and learn new technologies quickly and effectively.

## Responsibilities:

- Participate in reviews of stakeholder documents, software requirements and system architectural documents.
- Effectively communicate testing activities and findings in oral and written formats.
- Write test cases against software requirements and design documents.
- Execute test cases, identify defects, write bug reports, and verify bug fixes.
- Participate effectively in estimation, planning, cost-of-quality, and quality risk assessments.

## Education:

- Four-year degree in Computer Science, Computer Engineering, Electrical Engineering, Software Engineering or equivalent experience is desired.

## Experience with the following would be a great asset:

- Team Foundation Server
- SQL2008/2012

## Why Join Wenco?
