

**Wenco International Mining Systems** ([www.wencomine.com](http://www.wencomine.com)), a subsidiary of Hitachi Construction Machinery, is a software development and technology company that provides a series of technology product lines related to optimization and improvement of mines and material movers worldwide. Some of our products include:

- GPS-based fleet management systems
- Collision avoidance safety systems
- Asset Health and predictive maintenance
- Optimized Smart Dispatch
- Autonomous trucks and specialized automation
- Analytics and BI

As Wenco continues to build the next generation of technology, we need a wide range of professionals to help us achieve our objectives. Our rapid expansion has resulted in the need to develop a Cloud and Mobile Team, and as a result, we are looking for a full-time **Product Manager – Cloud & Mobile Applications** to join our head office in Richmond BC.

Reporting to the Vice President, Research and Development and working within a great but small team of professional product managers and product owners, this role will be responsible for defining and owning a brand new product line. You will bring your creativity and love for making incredible web and mobile applications to help guide a team towards awesome product while having fun getting there. We are starting a new product line that builds upon our 30 years in the industry to take it to the next level with the latest in cloud and mobile services.

This role will assume business ownership of a product line within Wenco's performance management software suite and engage closely with company stakeholders to add value in line with the market and forward business strategic objectives. If you are a driven, customer-focused individual who is looking to make a meaningful impact at a rapidly growing organization, we want to talk to you!

**Key Deliverables:**

- Produce product roadmaps based on the company's strategic goals, the market's demands and opportunities, and the technological and financial resources available;
- Communicate product strategies with stakeholders; prioritize and iterate ruthlessly on product backlogs to define minimum viable releases;
- Share product visions and articulate business value with engineering teams; lead the development (the what, not the how) from ideation to delivery;
- Generate development estimates, solution proposals, and release timelines for key stakeholders by working with other groups such as project management, engineering, sales, and customer support;
- Prepare business plans for new product proposals and ventures

**Responsibilities:**

- Gather and distill requirements from customers as well as internal and external stakeholders and translate them into an actionable vision and product roadmap;
- Gain a deep understanding of the market and Wenco's customer-base, identify and fill product gaps, and generate new ideas and intelligent solutions that improve customer experience and drive growth;
- Manage the entire product life cycle from strategic planning to tactical activities;

- Serve as primary product expert (functional, not technical) for a portfolio of software products with the ability to deliver detailed product-related presentations and demos to technical and business-oriented audiences;
- Work with R&D Managers and Project Managers to identify development effort to schedule milestones towards roadmap implementation;
- Scope and prioritize what (and when) the development teams will deliver based on business, product and customer impact;
- Work with development teams to define releases, address issues, and lead the vision of the product within the teams;
- Support marketing, sales, and support groups with the development and maintenance of various technical marketing collateral including product announcements, release notes, FAQs, user guides and field training

#### **EXPERIENCE, KNOWLEDGE, SKILLS AND ABILITY REQUIRED:**

##### **Experience, Knowledge & Requirements**

- University Degree or College Diploma in a related STEM discipline
- 3-5 years proven work experience in product management for software solutions delivered via cloud and mobile technologies;
- Experience working in an Agile software development environment and full software development lifecycle management having managed several entire product development cycles from concept to launch
- Product management experience related to large scale IoT platforms, big data and consumer web sites an asset
- Knowledge and understanding related to delivering SaaS products
- Experience with Web Services and Service Oriented Architectures (REST APIs)
- Previous product portfolio experience building product for iOS and Android
- Familiarity with Azure or AWS cloud services

##### **Skills and Abilities**

- Excellent stakeholder vision to requirement analysis capability
- Ability to gather and analyse requirements towards creating business recommendations and product vision from concept to delivery
- Excellent people skills with the ability to influence technical and cross-functional teams to get things done
- Proven analytical and problem-solving abilities
- Strong written and oral communication skills

#### **WHY JOIN WENCO?**

- We provide opportunities for growth within a fast scaling company
- We offer an extensive benefits plan
- We provide a fun working environment, including Fresh Fruit Mondays and Popcorn Fridays, along with table tennis, foosball, and electronic darts in our office
- We offer opportunities for continuous training and professional development (in-house and external) to learn the latest technologies
- We offer our employees a profit-sharing plan that provides them with the benefits of their hard work
- We provide free parking and shuttle service for employees using transit
- We are heavily involved in the community and join various events of non-profit organizations
- We offer much more!
