

Wenco BenchManager Grader

Flatten rugged terrain to design; reduce wear-and-tear on all your equipment

BenchManager Grader raises the accuracy of your motor graders with high-precision GNSS guidance. This increased precision empowers your graders to level roads and benches for the smoothest hauling possible.

Import design files into the system and follow the onscreen guidelines. Real-time data keeps your blade accurate within centimetres as you refine your mine to plan.

BenchManager Grader gives you the power to even out terrain to design — without any time-consuming surveys.

The system works interoperably with your design software, so graders can always cut and fill to your planned coordinates.

Rough roads slow hauling and drag down productivity. High-precision GNSS keeps your graders on target, so your roads inflict less wear-and-tear on equipment.

Reshape uneven roads — without surveying or grade-staking.

Precise control for precise contours.

Integrated data for smarter analysis.
