

# Wenco TireMax

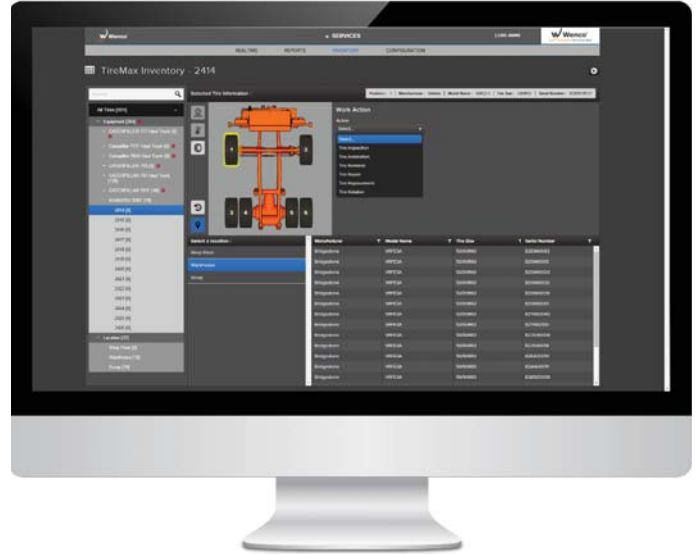

Track installation, rotation, and storage for your entire stock of tires

**TireMax** is the ultra-class tire management system for the mining industry. Our web-based application takes the hassle out of record keeping so you stay on top of your shifting tire stock.

When new tires arrive on site, open TireMax. Load the core data about each tire into the system. Manufacturer. Model. Size. Serial number. Then, you're all set to track your tires through their life cycle.

Access the drop-down menu to load tires into position on trucks. Use the same menu anytime you inspect, rotate, or replace them.

Can't find a tire? Check the TireMax records to see where it is and get it under control.

Tires are one of your mine's biggest costs and searching for them one of your biggest headaches.

With TireMax, all your time wasted hunting for stray tires becomes a thing of the past.

- Never lose a tire again

---

Reports give you solutions to all your tire problems — before they even start.

---

Maintains up-to-date records that make managing your supply chain a breeze.

---

A complete system for managing tire inventory for installations, replacements, and rotations.

---
