

Getting More Out of Your Mine

## **C++ Software Engineer**

Wenco International Mining Systems is a leading supplier of fleet management solutions and high precision GPS-based machine guidance solutions for the mining industry. Wenco has a global presence with offices worldwide and development centres in Vancouver, Canada and Brisbane, Australia.

We currently have an opportunity for an experienced Software Engineer to join us in our Brisbane office. You will work in a high functioning, collaborative, multi-disciplinary development team following Agile processes.

This permanent role is ideally suited to an intermediate level developer or a junior developer looking to take the next step in their career progression.

### **The successful candidate will hold:**

- Applicants must have at least 5 years of practical, full-time experience developing and maintaining software utilising modern C++ in a commercial environment
- Experience with at least one scripting language such as JavaScript, Python or Ruby
- Solid mathematics and algorithm development background

### **Desirable Skills & Experience:**

- Cross-platform application development in C++
- TDD and automated testing frameworks
- Familiarity with relational databases and SQL in general
- Real-time or embedded systems
- Location-based or GIS applications

### **Non-Technical Requirements:**

- An ability to clearly communicate technical concepts
- A preference for clarity and simplicity over unnecessary complexity
- A pragmatic approach to software development
- Applicants must either be an Australian citizen or Permanent Resident or hold a valid working visa

### **Why Join Wenco?**

- **We provide opportunities for continuous training and development (in-house and external) to learn the latest technologies related to desktop, web and/or cloud**
- **We offer our employees a profit sharing plan**
- **We offer much more!**
